

# PLANTS AND ANIMALS IN THE LOCAL ENVIRONMENT

## Glossary

**grow** – to become bigger

**germinate** – when a seed forms a small root and/or shoot

**produce** – to make

**reproduce** – to make more animals and plants

**seed** – the part of a plant that will grow into a new plant and/or shoot

Can you name these **animals** and **plants**?

Plants and animals live **everywhere** on our planet.

Use some of these words to describe where different plants and animals live –

**in, on, under, beneath, within, next to, beside, inside, over, above,**

Animals and plants make more of themselves by **reproducing**.

Examples

Humans give birth to **babies** → babies grow into **children** → children grow into **adult humans**

Chickens lay **eggs** → the eggs hatch into **chicks** → the chicks grow into **chickens**

Plants produce **seeds** → seeds germinate into **seedlings** → seedlings grow into **plants**
