

# GROWING PLANTS

## Glossary

**seed** – the part of a plant that will grow into a new plant

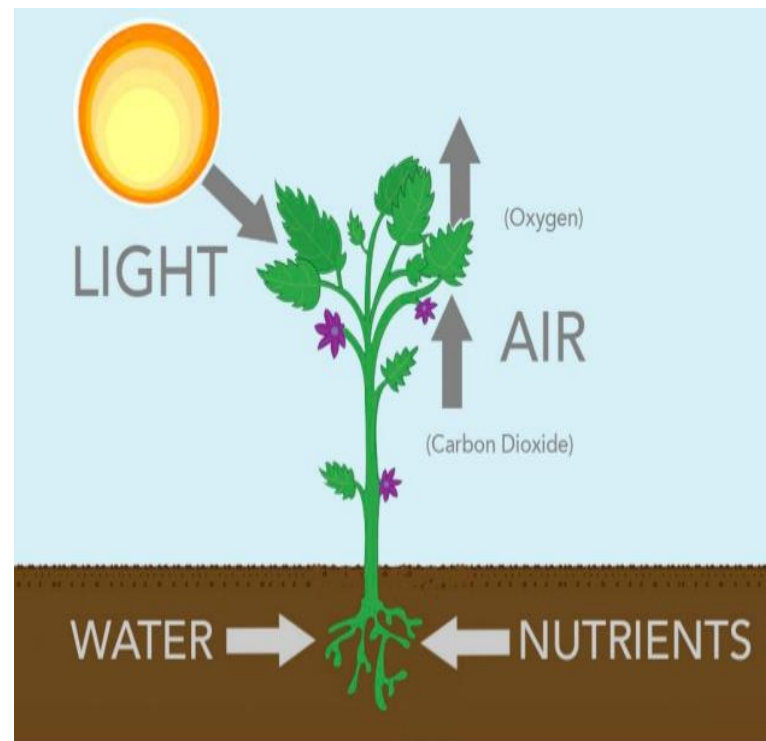

**seedling** – a baby plant

**nutrients** – food that plants use to grow e.g. nitrogen

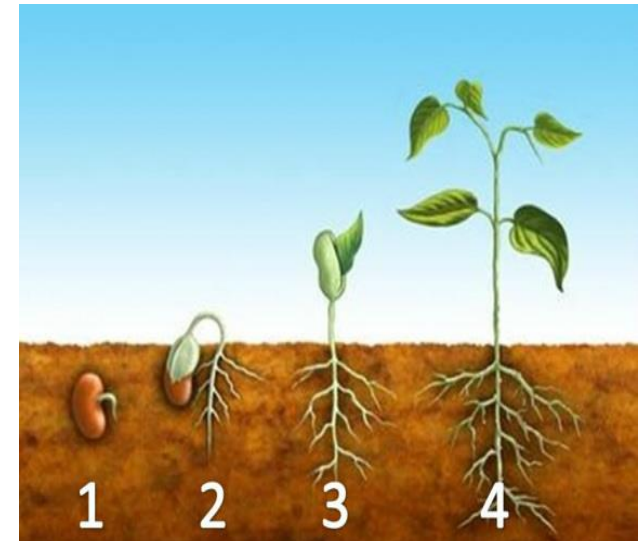

**carbon dioxide** – part of the air. Plants use this help make food.

**healthy** – living and growing well

Plants need: **water, light, air, nutrients** and **a suitable temperature** to grow and stay healthy.

A seed or a bulb will grow into a healthy plant if it is given a good environment.

## PARTS OF A FLOWER
